Summary

Dedicated System Engineer with 3+ years of hands-on experience in ServiceNow Administration & Development, DevOps, and Microsoft 365 environments. Proficient in automating workflows, developing Service Catalog items and JavaScript-based scripts, and supporting end-to-end ITSM operations. Skilled in JavaScript-based ServiceNow customization, Flow Designer automation, CI/CD pipeline deployment, and secure infrastructure management. Known for driving process automation, improving cross-department collaboration, and maintaining reliable service delivery across IT, HR, and Operations.

Experience

Neutara Technologies Private Limited
System Engineer

Location: Hyderabad
Date period: September 2021 - August 2024

- Administered and customized ServiceNow modules (Incident, Request, Change Management) to streamline IT operations.
- Designed and developed Catalog Items, Record Producers, Business Rules, Client Scripts, and UI Policies using Flow Designer and JavaScript for automation.
- Developed the Employee Onboarding Service Catalog item, enabling managers to submit onboarding requests automatically routed to IT, HR, and Facilities - reducing manual coordination by 40%.
- Managed user roles, groups, and ACLs ensuring secure, role-based access within ServiceNow.
- Integrated Microsoft 365, Jira, and Zoho Desk data with ServiceNow for unified request management and visibility.
- Supported DevOps operations by developing and maintaining Jenkins CI/CD pipelines for automated deployments and version control.
- Monitored system health using Zabbix and Kibana, ensuring uptime and proactive issue detection.
- Managed Microsoft 365 (Exchange Online, Teams, OneDrive, SharePoint), enforced MFA, and resolved user access issues.
- Served as SPOC for 100+ employees handling end-user support, VPN configuration (OpenVPN, SoftEther), and technical queries.
- Collaborated with HR and IT teams to enhance workflow efficiency and employee onboarding experience.

Projects

Employee Onboarding Automation (ServiceNow): Developed a Service Catalog item named "IT Onboarding Request" to automate new-hire IT setup, initiated by the IT team. Configured dynamic form behavior, backend logic, and automated task routing to streamline onboarding operations and reduce manual coordination time by 40%.

Technical Environment: Service Catalog Item, Flow Designer, Business Rules, Client Scripts, UI Policies

Responsibilities:

- Designed catalog form with custom fields (Employee Name, Start Date, Department, etc.).
- Implemented conditional logic and dynamic UI behavior using **Client Scripts** and **UI Policies**.
- Automated task creation (Assign Laptop, Create Email Account) using **Flow Designer**.
- Enforced backend logic with **Business Rules** for auto-assignment and due-date calculation.
- Configured email notifications for task owners and approval workflows.

Deployment Automation (DevOps): Developed and implemented Jenkins pipelines integrated with Bitbucket to automate deployments from source code to Tomcat servers running on Ubuntu. Set up separate pipelines for Development, Testing, and Production, reducing manual work and improving deployment speed by 30%.

Technical Environment: Jenkins, Bitbucket, Git, Ubuntu, Outlook, Tomcat

Responsibilities:

- Designed and configured CI/CD pipelines to deploy code from Bitbucket to Tomcat Server in Ubuntu.
- Created independent pipelines for Dev, Test, and Prod environments ensuring controlled and consistent releases.
- Implemented build validation, artifact management, and rollback mechanisms. First engineer in the company to fully automate manual deployment processes.

Skills

ServiceNow: Catalog Items, Record Producers, Workflows, Flow Designer, Business Rules, Client Scripts, UI Policies, Incident & Request Management, User Administration, JavaScript (UI & server-side scripting)

DevOps: Jenkins (CI/CD), Zabbix, Kibana, AWS (EC2, S3, IAM), Git, GitHub, Bitbucket

Microsoft 365: Exchange Online, Teams, SharePoint Online, OneDrive, MFA Configuration

Ticketing & Collaboration: ServiceNow, Jira, Zoho Desk, Microsoft Teams

Soft Skills: Communication, Multitasking, Problem-Solving, Collaboration

Education

M.Tech in Computer Science and Technology, SRKR Engineering College (2017 - 2020)

B.Tech in Computer Science and Engineering, VKR, VNB & AGK Engineering College (2014 - 2017)

Diploma in Computer Engineering, AVN Polytechnic College (2011 - 2014)

Certification

- Welcome to ServiceNow Micro-Certification
- ServiceNow Online Training (Frontlines Edutech)
- DevOps Online Training (Frontlines Edutech)

Accomplishments

- Nominated twice for the Best Employee of the Month at Neutara Technologies in 2023.
- Completed a 60-day training program on Oracle SQL and AWS Cloud Computing in September 2020.
- Successfully executed three hands-on projects on building and deploying apps on the AWS Cloud platform.
- Participated in technical events including paper presentations and quizzes at USHARAMA Fest and SIR CR REDDY Fest.
